Easy access for all desk users including those with disabilities

The ddb i-Vari desk is designed with absolutely no obstacles beneath the desk. This allows for improved access to IT equipment and offers considerably more legroom compared to conventional desks.

The desktop sits on an electronic actuator which can rise or lower to any height and can comfortably accommodate those who prefer to stand at their workstation. This concept is very popular and promotes huge health benefits, particularly for users with back complaints or those conscious of a sedentary lifestyle.

PRODUCT FEATURES

- Utilises available space
- Optional computer system & built in ports
- Optional larger keyboards and screens
- Height adjustable
- Fantastic colours and finishes available
- All electrics and IT securely fitted & safe
- Multifunctional capability for all types of users
- 100% recycled plastic desktop option
- Solid build quality, designed to last

*Electric height adjustable unit from 670mm to 1350mm

The versatile fixed monitor arm securely holds a flat screen in place, hides cables out of sight and houses an easy to access USB data port and audio connections.

i-vari SEN

With optional locked in IT equipment, the i-variSEN becomes a fully functioning computer table, including adjustable monitor arm, USB and audio connections.

The tidy cable management and high quality lockable castors means the i-vari SEN desk can easily be moved around, anywhere. The i-vari SEN clever interlocking extension is designed to allow for electric wheelchairs with left or right hand joysticks to butt right up to the desk itself.

The 25mm worktop is robust enough to withstand years of constant heavy duty use, that's why the i-vari SEN comes with a 25 year guarantee on the furniture and 3 years on the actuator. As with all DDB desks, the colours and finish options are endless and furthermore, the i-vari SEN desk can be designed to match with other types of furniture and desks, including teaching walls and storage systems. The maximum height achieved is 1350mm so all wheelchair types are accommodated for.

Extendable & removable desktop can be fitted to the left or right of the desk to provide additional wrist and arm support for electric wheelchairs

Optional large desktop keyboards can be fitted to assist specific user needs. A larger screen can also be added for those with sight impairment.
